

## Overland Bridge Project Advisory: I-95 Northbound Traffic Shift Coming Up

The Overland Bridge project team would like to advise a traffic shift is planned for Interstate 95 northbound travel between Friday, October 20, 8 p.m. and 6 a.m., Saturday, weather permitting, as part of the I-95 Overland Bridge Replacement project.

A detour is required for the on-ramp to I-95 northbound from Philips Highway to facilitate the shift.

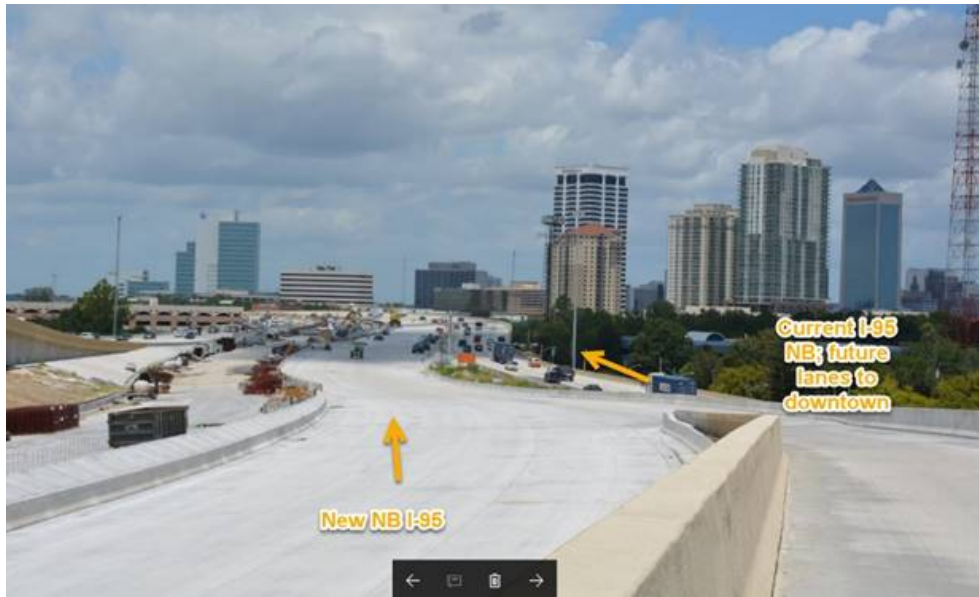

Once the shift occurs I-95 northbound traffic from south of San Diego Road to north of San Marco Boulevard will divide into a dedicated access road to downtown on the right, with I-95 northbound through-traffic on the left.

Motorists traveling to downtown will need to move into the right lanes approximately 1.5 miles earlier.

The northbound switch will place motorists on the permanent structures, which is another milestone toward completion of the \$160 million construction project that began in 2013 and is scheduled for completion in early 2018. Additional signage work added to the project, tropical weather and the upcoming holidays delay completion of the project.

Motorists traveling toward downtown should be alert and observe signage to make a decision early - whether they want to travel downtown or remain on I-95 toward the Fuller Warren Bridge as well as the I-10/I-95 Interchange.

Up-to-date lane closure information is posted to the I-95 Overland Bridge Replacement Project website at <http://www.i95overlandbridge.com>. A project hotline is available to assist the public with questions and concerns: 904-491-2110 or email [info@overlandbridge95.com](mailto:info@overlandbridge95.com).

I-95NB approaching decision point area before San Diego Road overpass.

I-95 NB decision point area approaching the San Diego Road overpass.

New I-95 NB lanes on left being finalized for traffic shift. Service lanes to downtown are on right.
